New Faces

Ellens Equipment is happy to welcome a new face to our office team.

Morgan Rodenbaugh started in August and is quickly learning the working ways of the agricultural sales and service business.

The new building is continuing to take shape. The service department is nearly covered and the concrete is almost all done for the interior of the building. The crews are starting on the roof and working to get the structure enclosed.

We Sell TOOLS!

Ellens Equipment will be stocking tools at our new facility but we can order tools for you now!

Contact our parts department to order the tools you need for your next job and come see us in the spring to check out our in stock tools!

Service your equipment now = Save time in the SPRING!

It's crucial to service your equipment before it sits idle for the long winter months. If you skip it, you could risk your equipment being down when you need to get the job done.

Ellens Equipment is offering fall and winter service checks to get your equipment ready for the spring before you put them away for the winter. See the attached information for equipment check prices.

Call Brent Whetstone to schedule a time to get your equipment in and checked before the snow falls!
