Did you know?...

- ⇒ Ellens Equipment has 6 service technicians who are trained to use EST. EST stands for Electronic Service Tool and is used to run diagnostic tests, retrieve equipment fault codes, troubleshoot problems and more.
- ⇒ Ellens Equipment has 6 laptops equipped with EST to diagnose your equipment. This means that each technician has the capability of connecting their own computer to ensure a timely diagnosis and resolution to your downed machine.
- ⇒ Ellens Equipment has 4 fully loaded service vehicles. That means that we have the capability to have 4 technicians at 4 different sites to support the equipment you need to run your operation.

Why does this matter?...

Our work does not stop after the sale. We are committed to keeping and maintaining the strongest support team in our industry. We want your equipment to continue to work for you for years to come and we have the technical team to do the job!
